

Addendum E : Sample week

NPR provided us with detailed carriage data for one year of programming for each of the sample stations. This, in combination with DACS rundowns and other materials supplied by producers forms the pool of data for the content analysis. Beginning the week of January 12th, we commenced analysis of this carriage data dating from September 1, 2002 through September 30, 2003 identifying and categorizing programming that fits our definition of independently produced based on a random sampling of weeks as follows:

1-Sep	2002	Sunday	Wk 1
11-Nov	2002	Monday	Wk 2
21-Jan	2003	Tuesday	Wk 3
25-Mar	2003	Wednesday	Wk 4
8-May	2003	Thursday	Wk 1
18-Jul	2003	Friday	Wk2
27-Sep	2003	Saturday	Wk 3
